

BBA

ACCOUNTING

Fintech Is Here

The changing face of modern business, financial and accounting practice offers an extensive range of opportunities in accounting services such as bookkeeping, auditing, payroll processing, taxation, risk assessment and control, management and business consultancy.

Our Bachelor of Business Administration in Accounting program equips students with the skills and competencies necessary for accounting practitioners to thrive in the growing Fintech environment. The students are exposed to develop skills in the areas of Branding, Customer Relations, Events Management, and other related industries.

The program aims to equip graduates with the intellectual and technical building blocks required for a career in business and accounting. It aims at developing professional accounting skills required to enable them to fit in the modern business environment

Accounting at ACity

The program aims to provide accounting graduates with skills and knowledge to take on professional positions in accounting and auditing upon graduation and advance to leadership positions or pursue research or graduate studies in the field.

The course provides students with the chance to turn their passion for numbers into a sound career opportunity in industry or government by integrating theory and practice within the context of a fast-changing industry, significantly influenced by new technology.

Top Careers in Accounting

Graduates of this program will be able to select, create, apply, integrate, and administer computing technologies to meet the needs of users within societal and organizational contexts. Some career options include:

-  Accounting Manager
-  Financial Accountant
-  Financial Manager
-  Budget Analyst
-  Credit Analyst
-  Tax Manager

Entrepreneurial Center**
for Creative freedom
& Innovation

Our Unique Learning Pillars

Experiential Learning

Hands-on learning to prepare students to readily apply concepts, to easily integrate into the workspace.

Contextual Learning

Solving real grass-root problems to expose students to the local context and develop empathy towards the continent's progress.

Unified Learning

A project-based approach that combines concepts across courses to connect the dots and enable unified learning.

Extensional Learning

Arms students with a viable toolkit to help them confront real-life issues, they may not have encountered during their academic life, squarely.
